

Autodesk Construction Cloud and Procore

Description

Matterport is now integrated with Autodesk Construction Cloud and Procore

You may import BIM Files or MatterPaks directly into either programme.

To take advantage of these integration, you need to meet the following criteria:

Have a Matterport Business plan or higher.

If you don't have a Business plan, you can still open Matterport Spaces in Autodesk and in Procore.

Have a valid Autodesk Construction Cloud or Procore account.

Have an account administrator perform the initial setup.

You do not need Developer Tools or an API/SDK token to use these integrations.
