

CaptureTrain Review

Description

5-Star Google Review

â€œIâ€™d highly recommend Oliverâ€™s training and products to anyone serious about using Matterport professionally.â€

Outstanding Matterport Training & Game-Changing Accessory

Google 5 Star Review from Kevin Mulvey

Outstanding Matterport Training & Game-Changing Accessory

We completed a two-day Matterport upskilling course with Oliver, which consisted of a classroom-based training day followed by a live, on-site project.

The structure worked extremely well with theory first, then applying it in a real-world setting.

Oliverâ€™s knowledge of Matterport is extensive and very clearly comes from years of hands-on experience.

The training was highly informative, practical, and focused on how to work efficiently and professionally on live projects, not just how the system works in theory.

You get insights that only come from actually doing the work day in, day out.

Following the training, we went on to purchase the MatterLevel, and it has made a massive difference to our workflow.

Being able to level the camera quickly and accurately has improved speed on site and removed a lot of the small frustrations that add up over a dayâ€™s scanning.

Itâ€™s simple, effective, and does exactly what itâ€™s meant to do making capture faster, more consistent, and more professional.

Overall, the training was well worth doing, and the MatterLevel is now a piece of kit we wouldnâ€™t want to be without.

Iâ€™d highly recommend Oliverâ€™s training and products to anyone serious about using Matterport professionally.

Thanks a mil for all your help Oliver.
